Help for every pupil when they're stuck.

Robyn is an AI teaching assistant that follows along during your lesson. When a pupil gets stuck, Robyn helps them think it through with prompts, clues and hints.

1	2	3
The teacher shares their screen and microphone from the classroom computer.	Pupils join on any device with a QR code (for tablets) or a link (laptops/Chromebooks).	Robyn provides carefully scaffolded support *based on what you just taught.*

- **Better outcomes for every ability group:** Every pupil gets support at their level, at the point of difficulty, without needing to wait for an adult. Robyn will provide a simpler explanation to a child who is struggling as easily as help a Year 6 improve their writing to GDS.
- **Research-aligned scaffolding:** Scaffolds and deepens the learning in line with Rosenshine's Principles of Instruction, and in line with research on self-scaffolding. Unlike a regular chatbot like ChatGPT, Robyn won't just give them the answer.
- **Any age group:** Works for any age group from Year 2 up to Year 13. Robyn will automatically adapt to meet the child at their level.
- **Not just for SEN:** Teachers and TAs can focus on the children who really need them, while Robyn is there for everyone else. For example, a teacher could work directly with a group of SEN children, while Robyn helps the middle and higher attaining children.
- **Reduces workload:** Robyn can automatically adapt the task to different levels, providing simpler explanations, or more challenging tasks, as required, so you don't have to produce different versions of everything.
- **Reduces stress:** Lets teachers focus distraction-free on whichever individual or group needs their attention, knowing that the rest of the class can ask Robyn.
- **Weekly reports:** Automated weekly reports show you what questions pupils are asking, and what misconceptions they may have.
- **Safeguarding alerts:** If a pupil uses inappropriate language, or discloses something concerning, Robyn flags it to the teacher privately.
- **Voice first:** Children can speak their question and they will receive a spoken answer. They can type if they prefer, and they can take a picture of their work.
- **Easy to implement:** Nothing to install, only the teacher needs to log in (children just scan the QR code or click a link).
- **Fully GDPR compliant:** ISO 27001 certified for Data Security, fully compliant with UK GDPR, and adheres to the DfE guidelines on use of AI in education.

What teachers and heads say.

From schools using Robyn in their classrooms every week.

> *Within a day of our free trial, the teacher trialling Robyn told me it was brilliant!* ***She didn't want to teach without Robyn in the class again*** *because of the impact it had on the learning within the classroom. … I was worried about the price as a small school with a challenging budget, but it is* ***excellent value for money!***

Katie Simons
Headteacher, Wallop School

I particularly like how it supports the children if they have found something difficult, but ***doesn't just give them the answer*** *— it guides them using the models you have used in the input and supports them in finding the answer themselves.*

Emma Jefferies
Headteacher, Stockbridge School

Its ability to handle independent queries has ***given staff valuable time to work more closely with children who need additional support.***

Michelle Marsh
Headteacher, Saint James School

It provided ***clarification, support and challenge to all the children in my class.*** *… The report at the end of each week allowed me to see the type of questions that were asked, and the responses and guidance they were given.*

Caroline Cunningham
Class Teacher, Beaulieu Village School

Robyn has allowed pupils of ***all abilities to be able to work more independently*** *and to problem solve when they find themselves at a tricky part within their learning journey.*

Tina Langridge
Oliver's Battery School

I love it! I have been teaching for 14 years, I wish I had this when I started. ***It makes teaching so much easier.***

Laura Morris
Year 5/6 Teacher, Stockbridge School

It's been really useful — especially with a large class and if the TA is out. ***It's like having 3 extra adults.***

Miss Preston
Pensans School

Try Robyn free in your classroom.

A free trial with **full setup and no obligation to continue**. After that, **£500 a year per teacher** — about 50p a lesson. Pupils join free on devices your school already has.
